

Digital Roadmap

Key Projects Update December 2017

- **Swindon IT Steering Group** has now been established, with representation from GWH, Swindon BC, CCG and GP IT
- **Primary care IT strategy** agreed with clinical leadership group
- **Blackpear End of Life Plans (ETTF) Project** – Funding secured via ETTF, order now placed with Blackpear for electronic shared plans (eSP). Finalised electronic form/plan in conjunction with GPs, Secondary Care & local Prospect Hospice, currently awaiting Black pear to make form live in production so testing can begin. Highlight reports being sent to NHSE as part of ETTF process.
- **Swindon or STP Wide COIN**– Fully engaged with HSCN (N3 replacement) procurement, Swindon CCG Assistant Director of IT is leading STP wide HSCN working group. Specifications have now been finalised including requirement for COIN, procurement due to go live Jan 2018. NHS England bid submitted to create primary care wide single domain\network
- **NHS Wi-Fi** – Patient and Staff Guest Wi-Fi now installed in all Swindon GP surgeries
- **e-referrals (Increasing use of national systems)** – Project underway to increase usage of e-referral, local Optimise referral solution now decommissioned (1st April 2017) and replaced with local CAS services on e-referrals. NHS England bid submitted for referral management document management system.
- **Electronic Prescribing (Increasing use of national systems)** – Swindon CCG prescription ordering direct service (POD) now live providing service for 16 practices with 2 more due in the next few months. This will improve EPS utilisation as practice required to use EPS to sign all prescriptions created via the POD.
- **Blackpear eRA (electronic transfer of urgent care information)** – New provider for SUCCESS urgent care centres (Medvivo) has taken over as of 1st April, currently working with Medvivo and Blackpear to enable out of hours service to electronically book into weekend SUCCESS appointments.
- **Docman (Making better use of existing Systems)** – Project underway to enable all Swindon practices to receive clinical correspondence from key providers via Docman EDT. NHS England bid submitted to upgrade practice to Docman 10 Docman 10
