The [Commission on RE](#) (2018) proposes a new vision for RE where RE teaching places greater emphasis on the lived experiences of people from religious and non-religious traditions. It identifies how the RE classroom should be a safe space where 'students can engage with controversial issues and learn to disagree respectfully with each other' (P28). At this conference we will be exploring ideas about what makes something 'true' and discussing how schools can enable pupils to become 'skilled cultural navigators'.
