

# The Baptist Church

What makes it special ?

# The Baptistry

- This swimming pool like thing is used for ‘totally immersing’ a new Christian at their baptism. It must be a very brave thing for someone to do

# Musical Instruments

- I was surprised that they had drums and guitars as well as a piano, this is different from the church in the village but I suppose in a way it's the same thing but I bet the songs sound cooler. Perhaps because more children come.

# Crosses

- There weren't any stained glass windows but they did have crosses and banners like this. They remember that Jesus died on the cross

There was no altar or pulpit like at the village church but they had had this lectern for the minister to speak at. I noticed it was in the centre of the church, not at one side

- This is what it looked like altogether, they had more comfortable chairs. This is because they have to sit and listen for longer, but they had hymn books and bibles like the village church

# One thing they could do to make it even more special

- I think they could have some statues of Mary like these I found on the internet. This would help people when they pray to have something to focus their thoughts on.
