How Effective is the Ramayana in providing moral guidance to Hindus?

Task: This task will be completed anonymously. Therefore you might want to ask learners to complete it in pencil.

1. Give learners a piece of paper.
2. Ask them to write how effective they feel the Ramayana is in providing moral guidance on the paper, by ranking from 1 to 5, 1 being very effective and 5 being totally ineffective.
3. Ask the learners to fold their piece of paper and put them in a box.
4. Give the pieces of paper out (this will be done randomly).
5. Already have signs for the numbers 1 to 5 set up at one side of the classroom. Ask the learners to look at the piece of paper they have been given and to line up next to the number on the wall that corresponds with the number on their piece of paper.
6. Ask some learners to justify the position they hold in the chart (which may or may not be a position they agree with)
